DETAILED ACTION

1. This action is in response to applicant's amendment, Paper No. 7, received on November 3, 2003.
2. Applicant's cancellation of claim 2 in Paper No. 7 is acknowledged.
3. Applicant's Petition from Requirement for Restriction has been carefully review. Claims 11-21, directed to an apparatus for manipulating blanks in a machine for packing smoker's products, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 11-21 hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in Paper No. 4 is hereby withdrawn.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the features in the following recitations:

"the steps of delivering to said station a series of successive packs, positioning each pack at said station in a manner such that at least a portion of a blank at said station is disposed between the pack and a collar, and jointly evacuating the pack, the blank and the respective collar from said station" in claim 3, lines 1-4, and

"wherein said evacuating step further includes introducing each pack, together with a blank and a collar, into a pocket of an indexible packing conveyor" in claim 7, lines 1-3,

must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Figures 1-6 do not show: a series of successive packs; a blank is disposed between the pack and a collar; and each pack (with blank and collar) into a pocket.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 3-17, 20 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Bright et al. (4,741,145).

Bright discloses a method and apparatus comprising: means 2 for transporting successive collars of a series of collars 10 from a source of collars to the assembling station (figure 1); means 4, 16 for conveying a succession of blanks c from the magazine 20, along a predetermined path, and on to the station so that each blank reaches the station while a collar 10 is at a standstill in a predetermined position; and

guide means 52 for positively guiding each blank at least along a portion of the path (figure 2).

Bright further discloses: blank or coupon c is inserted between pack 6 and collar 10 in a pocket 4 the station; means 30, 46 for moving a blank at the station from the guide means into the at least on pocket; and the guide means is spaced apart from the collar at the station (figures 2 & 3).

Allowable Subject Matter

7. Claims 18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion
